

BIG HEADACHE NEXT DOOR?

A BAMBOO HEDGE PROVIDES INSTANT PRIVACY!

BIG JOB?

NO PROBLEM, THAT'S WHY WE'RE CALLED BAMBOO GIANT!

Large installation on Mission Street in San Francisco.

Bamboo containment? It really works!

We have been installing bamboo for years and always recommend a containment barrier. With proper planning, bamboo can be integrated into any landscape with little maintenance or worry.

We install our proven barrier 27" deep around the bamboo planting to provide complete and effective containment.

Bamboo adds privacy, tranquility and style to your home or office.

BAMBOO GIANT

BAMBOO HEDGE SPECIALISTS

Bamboo - A versatile living fence, an exotic specimen plant and a fast-growing privacy screen.

Bamboo is a fast-growing shallow-rooted plant that is cold tolerant and drought resistant. It stays green all year long. A proven containment system is available

which involves digging a 27" ditch around the bamboo and installing a heavy polyethylene rhizome barrier.

Bamboo Giant distributes about 50 varieties to meet every need. Species

range from full sun to full shade and several will grow indoors. Five giant timber varieties will reach heights of up to 50 feet. Fourteen exotic tall timbers with heights between 25 and 50 feet include bright yellow, green and black culms; some with stripes and spots. Seventeen medium-sized bamboos between 12 and 30 feet include a range of color and form for every application. Twelve short varieties between 4 and 6 feet

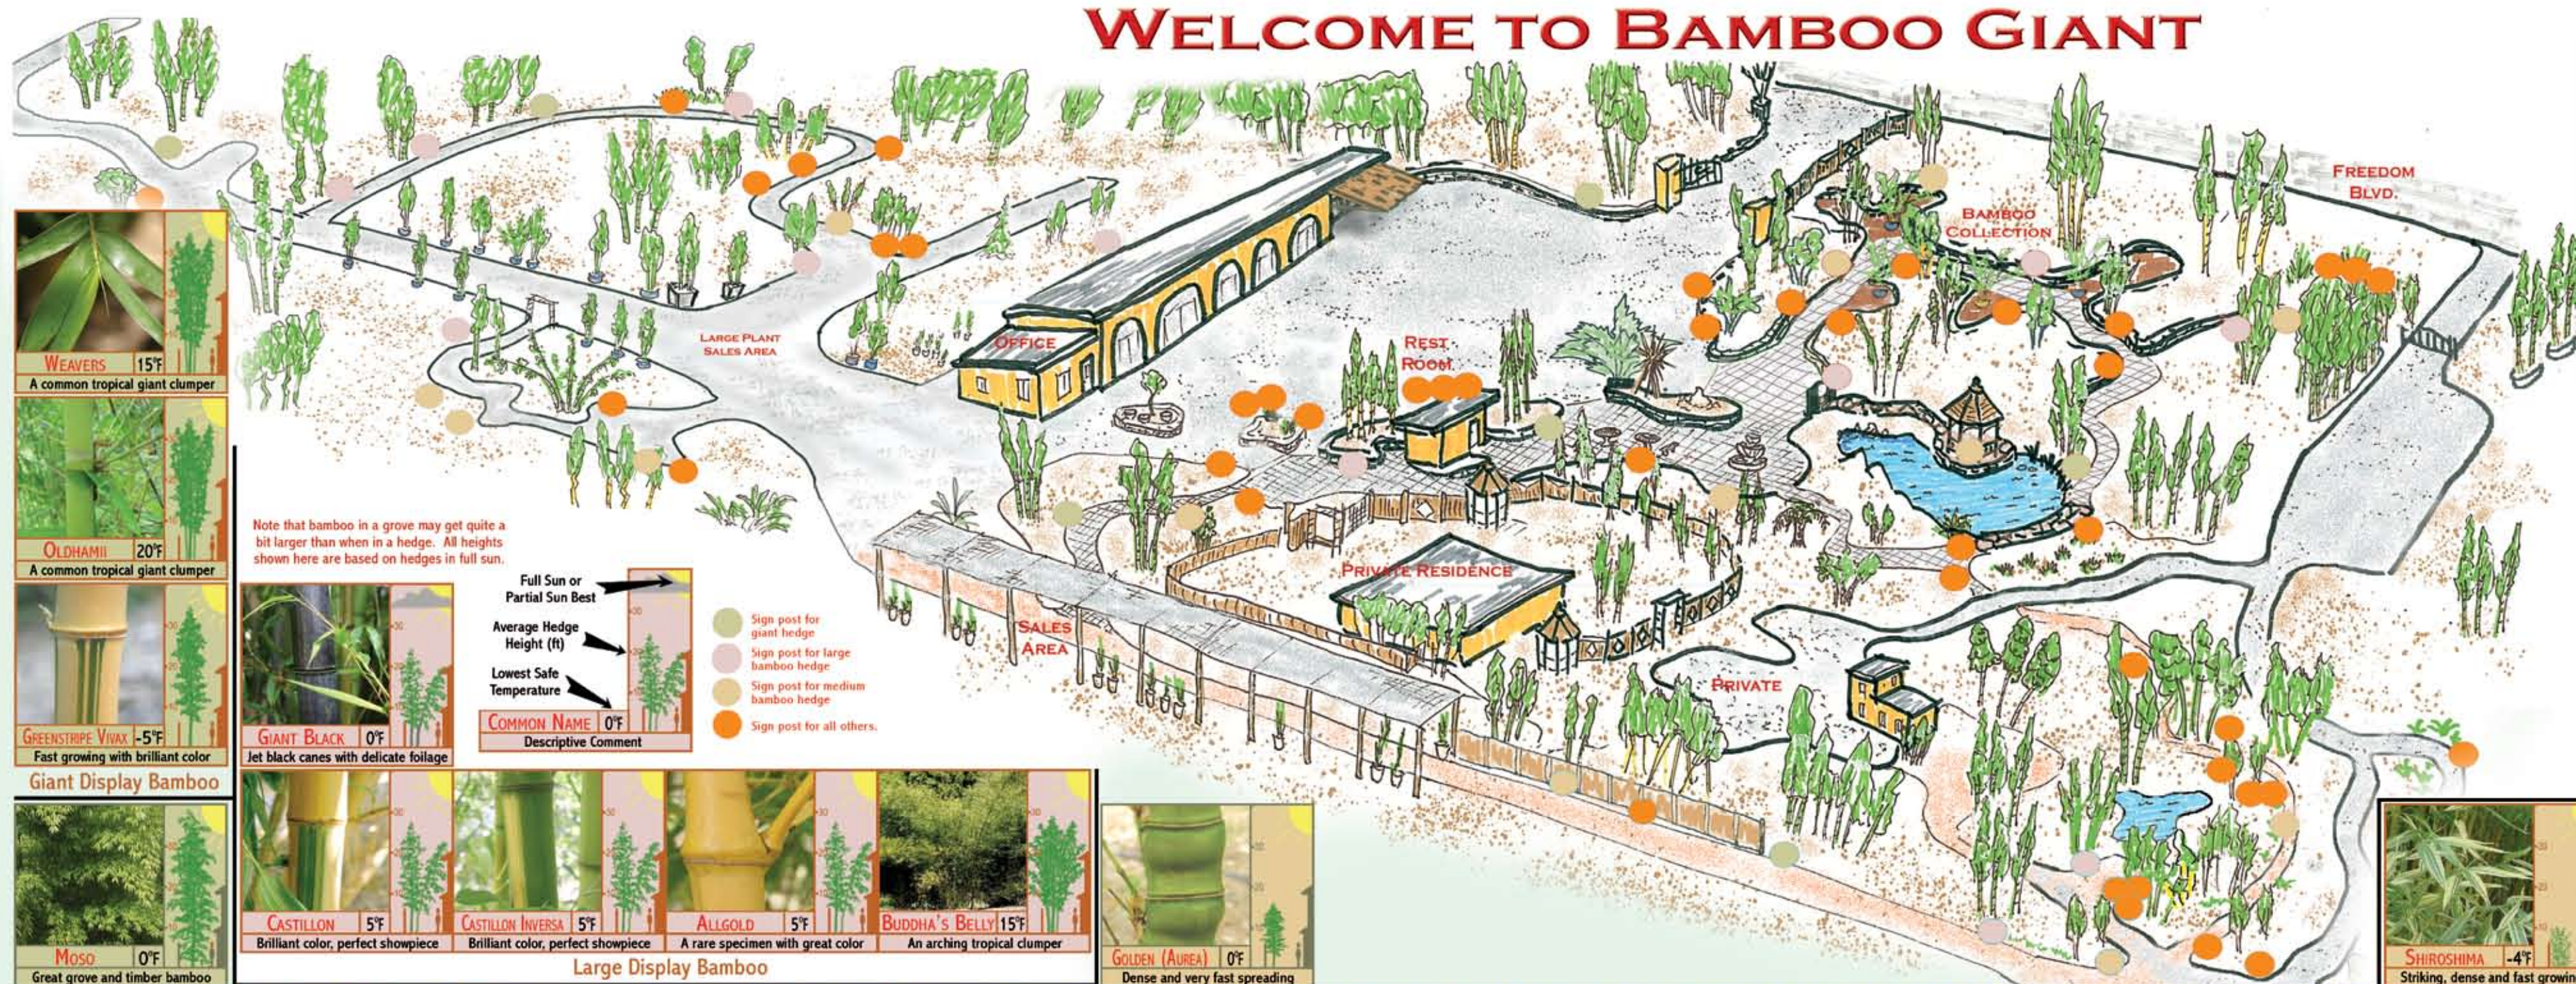

make a great ground cover or decorative planting. Clumping varieties can be planted without containment with no danger of spreading but running varieties should be contained.

Bamboo Giant specializes in large specimens for instant results. Not all varieties are available in all sizes.

WELCOME TO BAMBOO GIANT

CHINESE GODDESS 12°F Tiny leaves and arched culms	CHINO -10°F Fine long leaf with weeping form	FOUNTAIN -20°F Fine cascading leaves, likes shade
